THE SOVEREIGN WEALTH FUND BILL, 2026

The Sovereign Wealth Fund Bill, 2026 proposes the creation of a national sovereign wealth fund (SWF) to receive, manage, and invest surplus revenues from natural resources, exports, and other state-owned assets. The Bill outlines the fund's governance structure, including a Board of Trustees appointed by the President and overseen by a parliamentary committee, and mandates the establishment of an independent investment manager subject to annual audits by the Auditor-General. It also sets out the fund's investment objectives, risk-management protocols, and reporting requirements, thereby integrating the SWF into Kenya's public financial management framework.

Legally, the Bill amends Chapter 12 (Public Finance) of the Constitution of Kenya by introducing a new statutory instrument for the SWF, and it requires compliance with Article 201 (Public Finance) and Article 174 (Management of Public Resources). The legislation will obligate the National Treasury to allocate surplus revenues to the fund, restrict withdrawals to approved development projects, and impose fiduciary duties on trustees, creating new accountability mechanisms that could affect budgeting, fiscal policy, and inter-governmental transfers.
